

THE FIRST-EVER  
**LEXUS LC AND LC HYBRID**

From the uncompromising comes the incomparable.

Experience a visionary design that embodies  
our passion for the open road.

Experience the evolution of exhilaration,  
engineered from the ground up.

EXPERIENCE THE NEXT  
CHAPTER OF LEXUS

INTRODUCING THE 2018  
**LC AND LC HYBRID**

#### **THE FUTURE IN MOTION**

Pairing a visceral driving experience with a visionary form, the Lexus LC is the pinnacle of a decades-long commitment to innovative engineering and unbridled imagination. A daring coupe with a low, purposeful stance, the LC 500 captivates with a robust, naturally aspirated 5.0-liter V8 engine that generates a projected 467 horsepower<sup>12</sup> and a 0-to-60 time under 4.5 seconds.<sup>12,3</sup> Meticulously crafted with a variety of materials that enhance structural rigidity—including high-strength steel, lightweight carbon fiber and aluminum—the LC 500 also hosts all-new Premium Triple-Beam LED headlamps which house the industry's thinnest LED projectors for even greater weight reduction.

Embracing the art of performance, the LC achieves razor's-edge precision with an all-new 10-speed Sport Direct-Shift transmission with paddle shifters, a variable Active Sport Exhaust, and a new advanced multilink suspension. Built to conquer curves and command attention, the LC also offers a limited-slip rear differential, Dynamic Rear Steering and an active rear spoiler. Experience the future of Lexus at full throttle.

### **VISION TAKES FLIGHT**

Debuting an all-new, premium rear-wheel drive luxury platform, the LC balances passion with physics to forge an unprecedented connection between the driver and the drive. Tested and tuned at renowned tracks and iconic roadways across the world, the LC features a nearly ideal weight distribution for optimal balance. Low-set, deeply contoured seats closely align the driver's hip point with the vehicle's low center of gravity and help ensure that the driver receives enhanced lateral support during cornering and high Gs.

**A NEW SPECIES OF HYBRID**

Experience the breakthrough that recasts the entire concept of hybrid performance. The LC 500h signals the arrival of the new 3.5-liter V6 Multistage Hybrid. Engineered to feel like an extension of the driver for unparalleled responsiveness, the LC 500h features the instant torque and efficiency of a powerful electric motor with the direct

response of a multistage transmission. The unique transmission is the result of combining an Electronically controlled Continuously Variable Transmission with an automatic gearbox in order to deliver extraordinary linear acceleration and the responsive, visceral feel of a performance coupe. This is where hybrid means high performance.

### **PASSION MEETS PRECISION**

A grand touring vehicle that challenges the category, the aggressive stance of the LC gives way to a seductive interior. Striking craftsmanship and emotional forms dominate the cabin as sumptuous materials cloak every surface. A stunning balance of bleeding-edge design and subtle elegance, the sensual interior signals a new conquest in pure artistry with details like hand-stitching that

flows deep into the footwells, available Alcantara® and semi-aniline leather trim, and evocative door panels that encase the cabin in rich, undulating lines.

The LC entices with elegance but emboldens with technology. At the forefront of Lexus innovation, the LC premieres a suite of premium technology, including the next-generation Lexus Navigation System\* with a 10.25-inch display and

next-generation Lexus Multimedia® with a touchpad.<sup>5</sup> In addition to offering an advanced audio system by the industry-leading Mark Levinson®, the LC also features our most progressive safety technology yet, Lexus Safety System+. Housed within the expansive dash, the next-generation LFA-inspired performance gauge cluster enhances the alluring sense of depth and dimension present throughout the cabin.

## LC 500h

- Naturally Aspirated 3.5-Liter V6 Engine with Hybrid Technology
- Multistage Hybrid Transmission with Magnesium Paddle Shifters
- 354 Total System Horsepower (Projected)<sup>1,2</sup>
- 0-60 MPH Acceleration in less than 5 Seconds (Projected)<sup>1,2,3</sup>
- Lightweight Lithium Ion Battery
- Standard Panorama Glass Roof
- Standard 20-Inch Alloy Wheels<sup>7</sup>

## LC 500

- Naturally Aspirated 5.0-Liter V8 Engine
- 467 Horsepower (Projected)<sup>1,2</sup>
- 0-60 MPH Acceleration in less than 4.5 Seconds (Projected)<sup>1,2,3</sup>
- 10-Speed Sport Direct-Shift Transmission with Magnesium Paddle Shifters

- Available Carbon Fiber Roof
- Available 21-Inch Split-Five-Spoke Forged Alloy Wheels<sup>7</sup>
